

We use Times Table Rock Stars at Eversley which is an online programme designed to help pupils master their times tables through a model that encourages great recall of tables and high maths confidence.

The focus is both on learning multiplication facts and related division facts. As well as the children accessing this programme at school, we are also encouraging pupils to access the programme from home. The most effective way for pupils to participate from home is to take part in short bursts of practise daily or as frequently as possible.

Please find attached the following video guides to help support your children with using the Times Tables Rock Star online programme at home.

The first video below outlines the different game types the children can play:

<https://www.youtube.com/watch?v=4G-pFJNhl4>

The second video explores a set of interactive tools that can be used to help with learning timetables:
