

Design and Technology

At Eversley Primary School our aim is to provide pupils with practical opportunities to develop their creativity and imagination in a variety of contexts. Using examples of past and present designs, children have opportunities to experiment by researching, replicating and building upon ideas, by selecting appropriate resources and analysing their effectiveness.

Our aim is for all children to leave Eversley with the skills, knowledge and passion to apply themselves to progress and achieve their full potential in any aspect of their field of work or day to day life.
